

# Hope in Potential

Potential is hope  
The potential for what,  
More than what I have,  
The potential to get what I have only dreamed of?

How about the potential in you  
All that you could be  
I see so much in you  
If only you would reach for it

Life is not easy  
It will not be given to the hand that is closed  
But open that hand and it will be offered  
However it will only be offered

It must be reached for  
No matter how high  
You must keep reaching

You have the potential  
But your hand is not opened  
It has not reached

You must strive for what you want

I see potential in you  
For something I have longed for  
The potential to hope

For more  
I do not know.  
I see the potential in you to show me all that it could be  
This dream of mine

My hand is opened  
I am reaching  
But will you offer?

So for now I see potential

Potential in YOU!
